## Unlocking DeFi's Potential

Liquidity Farming Simplified with UPMAX

## What is UPMAX

UPMAX is a decentralized finance (DeFi) protocol designed to simplify and automate yield farming, a process by which rewards can be earned by providing liquidity to various DeFi protocols.

The platform utilizes its proprietary yield farming algorithms to optimize yield and increase the treasury, which is then used to buy back and burn \$MAX tokens.

### FARMING

Automated farming protocol to continuously grow the treasury

### BUYBACKS

Yield from treasury is used to buy \$MAX on the open market

### BURN

\$MAX tokens are burned to reduce supply

## The UPMAX Proprietary Liquidity Farming Protocol

UPMAX is a decentralized finance (DeFi) protocol designed to simplify and automate yield farming, a process by which rewards can be earned by providing liquidity to various DeFi protocols. The platform utilizes its proprietary yield farming algorithms to optimize yield and increase the treasury, which is then used to buy back and burn \$MAX tokens.

# \$MAX

Name  
UPMAX

Symbol  
\$MAX

Total Supply  
36,000,000 \$MAX

Network  
ETH

Contract Address  
To be announced

#### Actual Position

WETH/USDC (9.09)

Min: \$280 - Max: \$339  
Liquidity: 0 USDC | 11,9038 ETH  
Uncollected: 498,580 USDC | 0.1472 ETH
